**Need to print bill of materials, packing slips, invoices and other complex documents?**

The GridField functionality of CODESOFT 2015 provides unparalleled database and layout formatting capabilities.

You can now design, print, and manage these documents in the same way as your barcode labels.

# Added Barcodes

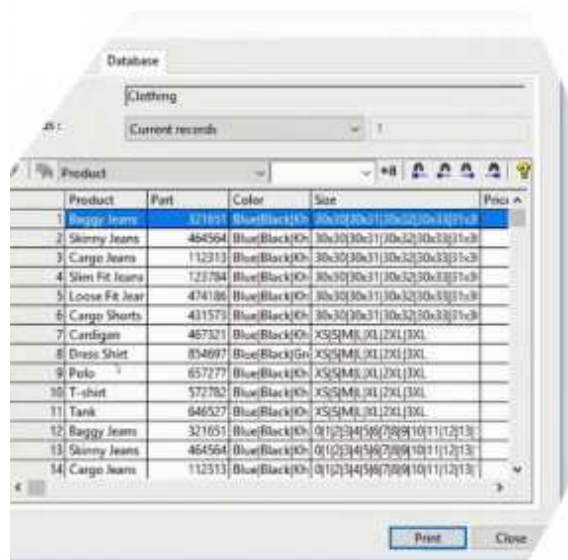

## Additional barcode support

LABELVIEW 2015 and CODESOFT 2015 include additional barcode support.

Support for Grid Matrix (used for Chinese characters) and Dot Code (used for direct part marking) has been added.

The GS1 barcode wizard has been enhanced to include new Application Identifiers (AIs).

# Variable Pick List

**Do you have multiple product types that need different pick lists?**

For example, a shirt should have a Size pick list that includes S, M, and L, but pants should have a different size pick list.

Both LABELVIEW 2015 and CODESOFT 2015 feature Variable Pick Lists. Now, the pick list will offer correct options based on which database record is selected.

# Port Watch Enhancement

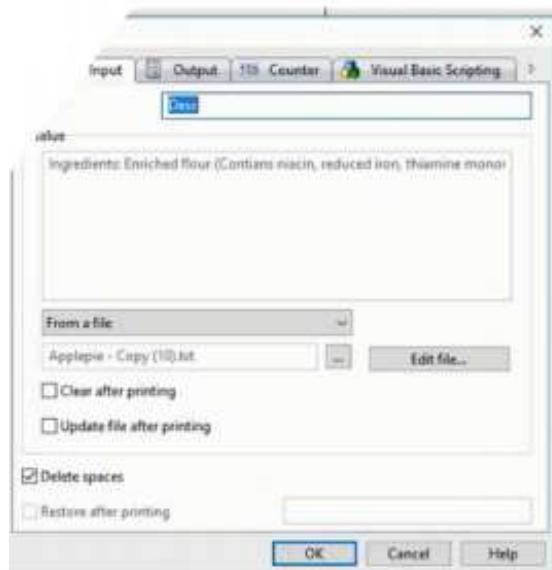

**Need to label weighed product, but not sure how many labels you'll need?**

CODESOFT 2015's enhanced Port Watch feature allows users to print labels without defining a quantity first.

This eliminates frustration that occurs when you end up with more product than you estimated.

# Edit Text File Shortcut

**Need to edit text files  
while working on your  
labels?**

Featured in both LABELVIEW 2015 and  
CODESOFT 2015 is a new "Edit File..." button.

This shortcut eliminates time-consuming steps of  
searching for the correct file and making edits in  
an outside application, such as NotePad.

And much more...
